Guidelines for Recycling in Congregations

Help keep 1.69 million tons of materials out of Wisconsin landfills annually.

1. If possible, use different colored recycling and garbage containers, which are available at hardware stores. Label one container “GARBAGE ONLY”. Identify items accepted by your community for recycling and list them on the recycling container.

2. Place the containers side by side (never alone) in the following areas:
   - Community rooms where people gather
   - Outside meeting rooms
   - In offices

3. Empty the containers regularly.

4. Call to find out if your municipality picks up recycling from congregation buildings or if you must contract with a private firm.

5. Collect recyclables such as athletic shoes, compact fluorescent bulbs or rechargeable and lithium batteries. Contact Keep Greater Milwaukee Beautiful for more information. (www.kgmb.org 414-272-5462)
